

Jeanette Metzler is a staple in the Wyandotte County & Johnson County areas, where she has led, managed and implemented Community Health Assessments (CHAs) and Community Health Improvement Projects (CHIPs) while working to develop implementation strategies. She has also been instrumental in identifying and addressing barriers to healthcare with a special focus on addressing the social determinants of health. She holds a degree in Exercise Science, with an emphasis in health, wellness and aging. She has served as Community Benefit Manager for Advent Health and Executive Director of Well Life at St. Joseph Medical Center. During that time, she expanded a hospital subsidized community health and wellness program to a for-profit entity, Well Life at Work (which provides health screenings, health education and other wellness services to large and small employers).
